

Thalassa Vane-Tempest

Senior Site Reliability Engineer

t.vanetempest@cloud-architect.eu | +353-87-555-0192 | Remote, EU

SUMMARY

Highly experienced Site Reliability Engineer with over 10 years of expertise in designing scalable, fault-tolerant distributed systems. Proven track record in automating infrastructure lifecycle management and optimizing cloud-native performance for high-traffic global platforms.

EXPERIENCE

Senior SRE - NebulaStream Systems

2020 - Present

Lead the migration of legacy monolithic services to a microservices architecture on Kubernetes, reducing deployment latency by 40 percent. Manage multi-region cloud infrastructure and implement robust observability stacks using Prometheus and Grafana.

Cloud Infrastructure Engineer - Aetheris Data Solutions

2016 - 2020

Architected automated CI/CD pipelines using Jenkins and Terraform, significantly improving release frequency. Maintained 99.99 percent uptime for core customer-facing APIs through proactive incident response and chaos engineering.

Systems Administrator - Ironclad Hosting Group

2013 - 2016

Managed large-scale Linux server environments and optimized database performance for high-concurrency web applications. Developed internal tooling in Python to automate routine server maintenance tasks.

SKILLS

Kubernetes - Terraform - Python - Go - AWS - Prometheus - Grafana - Docker - Ansible - Linux Kernel Tuning - Helm - Kafka

EDUCATION

Master of Science in Distributed Systems - Technical University of Delft (2011 - 2013)

Bachelor of Science in Computer Science - University of Warsaw (2008 - 2011)

LANGUAGES

English (Native) - Dutch (Fluent) - Polish (Professional Working Proficiency)
