

Vasco Quintela-Sampaio

Backend Engineer (Java)

vasco.qsampaio@techmail.pt | +351 912 345 678 | Lisbon, Portugal

SUMMARY

Dedicated Backend Engineer with over 5 years of experience in building scalable microservices and robust API architectures. Proven track record in optimizing Java-based systems and collaborating with cross-functional teams to deliver high-performance software solutions.

EXPERIENCE

Backend Developer - Lusitania FinTech Solutions

2021 - Present

Lead the development of core payment processing modules using Java 17 and Spring Boot. Reduced latency by 25% through database query optimization and caching strategies.

Software Engineer - Tagus Digital Systems

2018 - 2021

Developed and maintained RESTful APIs for e-commerce platforms. Implemented CI/CD pipelines and automated testing suites to improve deployment reliability.

Junior Java Developer - Alentejo Software House

2016 - 2018

Assisted in the migration of legacy monolithic applications to microservices. Gained hands-on experience with Spring Framework and PostgreSQL database management.

SKILLS

Java - Spring Boot - Hibernate - PostgreSQL - Docker - Kubernetes - AWS - Redis - Kafka - JUnit - Maven - Git

EDUCATION

Master of Science in Computer Engineering - Instituto Superior Tecnico (2014 - 2016)

Bachelor of Science in Informatics - Universidade de Lisboa (2011 - 2014)

LANGUAGES

Portuguese (Native) - English (Fluent) - Spanish (Conversational)
