

Thilo von Hohenstein

Senior Embedded Systems Engineer

thilo.v.hohenstein@munich-tech-mail.de | +49 89 555 0192 | Munich, Germany

SUMMARY

Highly experienced Embedded Systems Engineer with over 10 years of expertise in developing safety-critical firmware for automotive and industrial applications. Proven track record in leading cross-functional teams to deliver high-performance, real-time systems while adhering to strict ISO 26262 standards.

EXPERIENCE

Senior Embedded Software Engineer - Bavarian Automotive Dynamics

2018 - Present

Lead the development of powertrain control modules, focusing on low-level driver optimization and real-time operating system integration for electric vehicle platforms.

Embedded Systems Developer - Isar Robotics Solutions

2014 - 2018

Designed and implemented firmware for autonomous warehouse robots, utilizing ARM Cortex-M architectures and optimizing power consumption for long-term battery operation.

Junior Firmware Engineer - Munich Sensor Systems GmbH

2012 - 2014

Developed embedded drivers for industrial pressure sensors and assisted in the migration of legacy codebases to modern C standards.

SKILLS

C - C++ - RTOS - ARM Cortex-M - CAN Bus - ISO 26262 - Python - Git - Jira - Embedded Linux - SPI/I2C - Unit Testing

EDUCATION

Master of Science in Electrical Engineering - Technical University of Munich (2010 - 2012)

Bachelor of Science in Mechatronics - University of Stuttgart (2007 - 2010)

LANGUAGES

German (Native) - English (Fluent) - French (Intermediate)
